CSP Annual Science Fair – 2016

Dear Fellow Pioneers of Science,

I would like to cordially invite you to the Science Fair at our campus in Hanover MD. With all the support from the scientific community this memorable event will be a huge success.

Chesapeake Science Point Public Charter School is a unique school that is proud of its small and diverse student body. Our mission is to take advantage of a higher learning collaborative environment with our goal to master the areas of Technology, Math and Science to be college and career ready.

As you know, there are many science-influenced basic skills expected by employers. Our students will have to make tough decisions that no other generation has encountered and will be influenced by their understanding of emerging science and technology. Science Fairs involve the integration of Science with Technology and Engineering, which will require them to apply these skills to a topic of interest to them. A Science Fair is an essential key to understanding the scientific method and completing, therefore, have a better understanding of Science.

On Saturday, December 17, 2016 from 8:00 to 3:30, students from Grades 6-12 will present their projects. This memorable event is expected to have over 200 projects which will demonstrate the enthusiasm our students have for both science and the pursuit of knowledge. We are in great need of dedicated members who would like to share their enthusiasm for science by volunteering to be a judge in our Science Fair. Prior judging experience is not required; a brief judging session will be given prior to the actual judging. In appreciation of your time, breakfast, lunch, and a certificate for your sacrifice of time will be given. We anticipate the need for a minimum of 50 judges. If you know anyone else who would also be interested in helping with judging, please relay this information.

This will be a great opportunity for you to see what our school is about and to meet all the exemplary students. If you are interested in helping young students develop as future scientists and reach their full potential, please contact us immediately. We look forward to making your acquaintance.

Best regards,

Ashish Vadalia
