Monthly Meeting and Lecture

Wednesday, 18 August 2021 (6:00 – 8:00 pm)

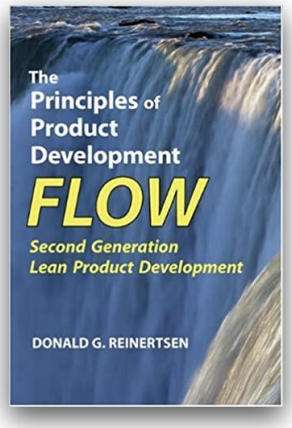
Systems Engineers … Where do we fit in an Agile Environment?

Mr. Peter Luckey

Location: This presentation is purely **VIRTUAL/ONLINE.**

An online chat questions-and-answers session will also be available. Webcast Link will be sent to Registrants

Presentation: It's only within the last five years that the Scaled Agile Framework (SAFe) has accommodated cyber-physical systems engineering. This presentation focuses on how Model Based System Engineering (MBSE), aligned with some of the DoD's Digital Engineering Strategy objectives, can effectively be used in the 'agile at scale' frameworks that are becoming more common in our hardware-inclusive engineering environments.



Door Prize for this month
The Principles of Product Development FLOW
By Donald G. Reinertsen

Speaker: Peter Luckey, a Senior Solutions Consultant at 321 Gang, is a Certified Scrum Master and a Certified SAFe Program Consultant (SPC). He received his master's degree in computer science from Purdue University. Peter began his professional career in IBM's Federal Systems Division as a programmer and then became the manager of IBM's Rational Software Development Environment. Concurrently, Peter worked as an Adjunct Associate Professor at the State University of New York Binghamton teaching software engineering and publishing a number of papers on the subject. Since joining Rational, Peter has been involved in selling and supporting Rational, now IBM, tools and the processes supported by these tools. These processes include topics such as Agile, MBSE, and SAFe. Peter is also an Atlassian Jira Align technical professional.
